

## Why French?

## SKILLS

### A message from Mrs Clarke, our Modern Foreign Languages lead:

French at Darlinghurst is interesting, stimulating and encourages a thirst for learning a language and preparing children for their language journey through life. We make lessons fun, engaging and interactive where all children can achieve their best. Every child can complete a lesson learning new and exciting vocabulary or even full sentences to have in conversations. We also strengthen their sense of identity through learning about the French culture. Our goal is for them to be passionate, curious and confident about their own foreign language learning abilities when they finish the primary school phase of their education.

### Design and Purpose

At Darlinghurst we use the scheme and resources from Language Angels. This is slightly adapted to meet the needs of our pupils and fit within our layered lesson approach. Language Angels provides teachers with weekly interactive lessons to complete with their sessions. They also have the flexibility to supplement this with their own ideas and experience and those of their colleagues.

The progression of skills is mapped across each unit:

- Speaking,
- Listening,
- Reading,
- Writing
- and Grammar.

The lessons are designed to motivate, captivate and interest children from the first moment. They have clear, achievable objectives and incorporate different learning styles. SEN children have access to the curriculum through variation of task, grouping or support from an adult.

Learning a modern foreign language is a statutory requirement in KS2 and each class has a timetabled lesson of at least 45 mins per week every other week.

French is becoming embedded into everyday school life in order to consolidate knowledge and ensure new language is retained. This occurs through greetings as children come into class or using French numbers in maths.

### Difference

Our children increase their cognitive skills across other areas of learning through the development of learning a language.

Each Language Angel lesson begins by recapping previous words or phrases learnt through the interactive aspect of the programme. Teachers are able to click on sound buttons that 'say' the words giving the children the opportunity to repeat it back. This ensures children are exposed to and learn the correct pronunciation. A set of French children characters guide the rest of the lesson, helping pupils learn new vocabulary, building them into phrases, sentences or even simple conversations. Each slide gives a visual representation of the word as well, further aiding understanding.

The lesson progresses onto showing the written form of the word alongside the sound buttons. Tasks then involve children writing down words and phrases supported by the visual element seen

during the lesson. Lessons move slowly and are repetitive ensuring that new language is embedded into pupil's long-term memory.

Our children are equipped to be confident individuals as we challenge them to constantly develop their language skills in each of the 5 main learning areas.
