

Darlinghurst Academy Year 6 Summer 2 : Why do people have different viewpoints about climate change?

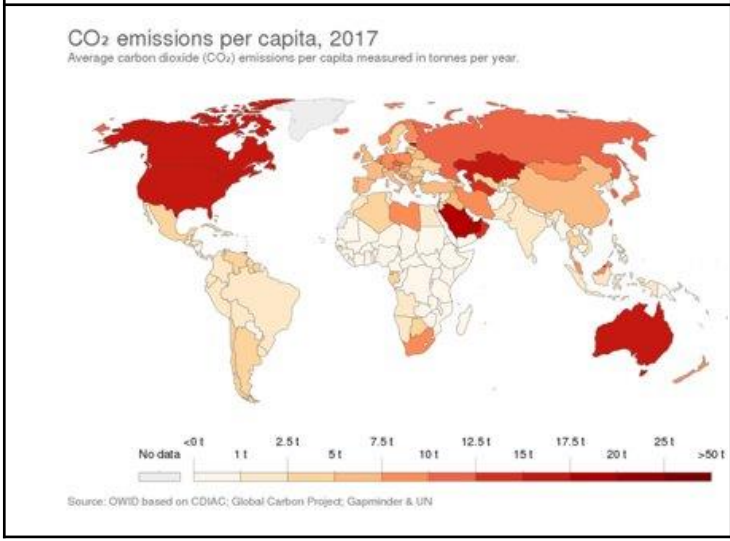

Vocabulary

climate	Climate is a description of the average weather conditions in a certain place for the past 30 or so years. Different areas of the world have different climates (climate zones).
weather	Weather is a description of what the conditions are like in a particular place.
Deep time	describes the immense span of geologic time
Fossil fuels	a natural fuel such as oil, coal or gas, formed in the geological past from the remains of living organisms.
Gross Domestic Product (GDP)	the total value of goods produced and services provided in a country during one year. It is calculated by measuring income and spending divided by the population.
media	Media is the name we give to any type of communication that carries a message.

GDP of countries

Carbon emissions by country

Countries affected by climate change
